GENERAL INFORMATION

SIMPLWINDOWS NAME:	Panasonic PT-AX200 Projector
CATEGORY:	TV/Video Projector
VERSION:	1.00
SUMMARY:	This module controls all of the functions of the Panasonic PT-AX200 projector
GENERAL NOTES:	<p>This module controls all of the functions of the Panasonic PT-AX200 projector. True feedback is provided for most commands. When the Poll_Enable input is asserted (Default =1), the projector will be polled every 3 seconds to determine the state of power, inputs, picture modes, sleep modes, shutter modes and freeze state. Typically, you could enable polling when the projector's particular control page is active and displayed on a touch panel. You would then disable polling at other times. Please note that any time the projector is polled for status, it will disable the Shutter_Toggle command.</p>
